# Retail Price List

*fall 1921*

*Spring 22*

**I**T IS OUR AIM to grow and sell only those plants which are suited to Southern conditions or other equable climates of like nature. We do not care to sell to buyers living in localities where we may feel that the plants offered may fail to thrive and give satisfying results. We desire to co-operate and assist you in all of your garden problems, and to this end invite your correspondence pertaining to floral or horticultural matters.

Prices noted herein are as low as well-grown plants can be produced. A good plant usually cannot be grown in one or two seasons, and the term one-year or two-year-old, and heights given, such as 18-24 inches, 2-3 feet, are usually very misleading. A Spirea van Houttei, one year old may be 3-4 feet high, but it should not be compared in price or value to a well-grown plant of the same height carrying from 15 to 25 branches and frequently transplanted.

## Landscape Department

We have competent men in charge of this department, and are prepared to give prompt and skillful service. We invite correspondence, consultations and every feature pertaining to this profession relative to the elemental materials entering into this work.

## Specimen Plants

We can supply large specimen plants of Conifers, Broad-leaf Evergreens, Shrubs, Roses, Perennials in large clumps, and other plants suited for immediate effect. Inspection of our premises will show many desirable plants especially grown for any utilitarian purpose.

# The United States Nursery Company

Roseacres, Mississippi

## ROSES

All Roses field grown, No. 1 grade

	Each	per 10	per 100

Pecans, 3 to 4 feet.....	1.50	13.50	110.00

# Specimen Plants

These include those which are not listed in height, breadth and caliper. Prices with description will be given to those interested, but when convenient, we prefer personal inspection.

In selecting plants for your lawn or premises, you are not planting for a day or year, but possibly a lifetime. Not only your own comfort and pleasure should be considered, but the passerby, your neighbor, each and all, are interested and pleased at the sight of beautiful yard embellishments—topographic aspect, outlines general design, adaptability of plants to soil, and, in brief, a comprehensive plan that embodies the practical with the æsthetic, the finished picture.

# Large Orders

Where conditions justify, we shall be glad to quote special prices on orders in car lots.
